MC0607 Coehorn Mortar

This is a full scale mortar. The Coehorn was the lightest piece designed to be carried by two men and was the most portable of the regular mortars. Our reproduction is a cast iron piece with a straight 1/4" steel liner; welded backplate. 2 1/4" bore. Mortar weight 80 pounds and is 13 3/4" in overall length. Diameter is 6" at the breech, 6 1/2" at the muzzle with 2 1/8" trunnions. Trunnion length is 1 1/2" with spacing between the trunnions of 6". Barrel has 1/4" vent hole. These barrels are cast iron pieces that require final finishing to obtain a smooth finish. Made in the USA.
